Assistant Director, OSI
Attn: Mr. George A. Horkan

8 April 1955

Chairman, NIS Committee

NIS Section 45 Production Schedules

1. The NIS Committee approved the new allocations of production responsibility for Section 45 (Health and Sanitation) as set forth in Tab A to the memorandum of 22 March 1955 from the Assistant Chief of Staff, G-2, Intelligence, to the Director of Central Intelligence, to become effective 1 July 1955. (Refer to Paragraph 6, NIS Committee Meeting No. 192 of 29 March 1955.)

2. It is therefore requested that your office, in its capacity as Section 45 coordinator, prepare in consultation with the appropriate offices of the Department of the Army a Section 45 production schedule for Fiscal Year 1956, and a Section 45 production forecast for Fiscal Years 1957, 1958, and 1959, which should comprise eight NIS Areas a year.

3. There is attached a list of areas for which Sections 45 are needed in support of Chapter I and Section 40 scheduling. There is also included a list of areas for which Sections 45 are needed to complete initial Chapter IV coverage, or to overcome deficiencies in published Sections 45 under the Maintenance Program. I hope this list will be helpful in fulfilling your initial coordination responsibilities for this important topic of the National Intelligence Survey.
